Medical Equipment

Our philosophy

The company Andreas Junghans® has been operating in the stainless steel processing industry for the past 30 years. The company supplies national and international customers from a variety of industries with components of the highest quality.

For several years the company designs, develops and manufactures Equipment for different application in medical laboratories and institutes. Andreas Junghans® offers a variety of services that include equipment for buildings, customized worktables and standard products. During the development process the attention is on the human engineering, the operator convenience and the compliance with MAC limits by law.

The company Andreas Junghans® combined all necessary steps from the design to the manufacturing. Together with you, our customer, we develop a optimal solution for your application. Count on us in case of support, service and the supply of spare parts.

All products made by Andreas Junghans® are customized for the individual conditions at the point of use. Experienced engineers supports you during the developmet in matters of dimensioning, material selction and the definition of the test parameters.

System variability by applying analytics, logistical and technical optimization

Working tables

The dissecting, cutting and other working tables are completely made of stainless steel. If possible the tables are supported with power, water, waste water, fresh air and suction by way of a central support column. Optional the tables are equipped with different worktops or with a plug-in module for a mortuary tray.

Leavings and liquids are drained in a basin underneath the worktop with down-grade toward a sink with waste sieve. The basin is cleaned by an adjustable continuous washing with valve. Beside of the worktop a washbasin is seamless welded. The inflow capacity for the hand sprinkler is regulated by a knee-operated bath mixer. The working height of the tables is continuously adjustable with electrical lift mechanism.

Supervising manufacturing

Management systems, certificates, admissions (to inspect in the brochure „qualifikations“) and modern software guarantees a reproducible manufacturing and a delivery just in time and certified.

For the connection to central support systems we offer different adapters.

Products and services

Dissecting tables

- electrical or hydraulic height adjustment
- different worktops (convex, concave, multipart)
- plug-in module for mortuary tray
- suction
- integrated continuous washing with valve
- concave basin with sink and waste sieve
- washbasin with flexible tube and hand sprinkler
- electrical supply (splash water proof)

Cutting tables

- Single or double workstation
- central suction with cover
- concave basin with sink and waste sieve
- multipart worktop with perforation
- washbasin with flexible tube and hand sprinkler
- formalin sink with sieve
- electrical supply (splash water proof)

Preparation cabinets

- made of stainless steel 1.4301 oder 1.4571
- sidewalls, floor and top double-walled
- adjustable shelves
- drain for fresh and waste air
- doors double-walled
- glass section
- removable basin underneath floor
- base with adjustable feet

Lift and transport trucks

- continuously height adjustment
- lockable smooth running wheels
- torsion-resistant steel frame structure
- Rollenauflage, Muldenarretierung
- different inset baskets
- completely made of stainless steel

Certificates and licences

- *quality management:* producer qualification by DIN EN ISO 9001:2008
- *comprehensive welding quality requirements:* producer qualification by DIN EN ISO 3834-2
- *quality requirements by manufacturing military products:* producer qualification Q2 by DIN 2303
- *welding of aluminium constructions:* producer qualification class B by DIN V 4113-3
- *welding of steel constructions:* producer qualification class D by DIN 18800-7:2008-11
- *welding of rail vehicles and vehicle parts:* producer qualification CLI by DIN EN 15085-2
- *quality requirements water law:* specialist company by § 19 I Water Management Act
